

Hackfolio - User Manual

System Role: Professional Portfolio & Project Showcase Management

Target Audience: Developers, Recruiters, and Administrators

1. Introduction

This user manual provides a comprehensive, step-by-step guide for navigating and utilizing the Hackfolio System. Designed to eliminate the delays of static PDF resumes and manual website building, this digital platform ensures your professional showcase is always up-to-date and visually stunning. The guide is divided into specific sections based on your assigned user role.

2. Getting Started (Authentication)

- **Accessing the Portal:** Open your web browser and navigate to the designated Hackfolio URL.
- **Logging In:** Enter your registered email address and password.
- **Password Recovery:** If you forget your password, click the Forgot Password link to receive a secure One-Time Password (OTP) via email to reset your credentials.

3. Viewer Portal Guide

The Viewer Portal is optimized for recruiters and collaborators to quickly locate and explore professional project showcases.

- **The Portfolio Feed:** Upon access, the public dashboard displays a grid of featured portfolios and recent projects.
- **Viewing Details:** Click on any portfolio card to expand the view and explore project descriptions, technical stacks, and live links.
- **Downloading Assets:** If the builder has attached a resume or project documentation, a Download button will be visible. Clicking this securely downloads the file from the cloud directly to your device.

4. Builder Interface Guide

The Builder Interface grants developers the ability to securely create and distribute their professional portfolios.

- **Creating a Portfolio:** Navigate to the Dashboard and click 'Create New' to start your journey.
- **Drag-and-Drop Customization:** Use the intuitive builder to add sections (e.g., Projects, Skills, About). Reorder them using the drag handles to match your preferred layout.
- **Content Formatting:** Enter a clear Title and Tagline. Provide full details in the description boxes using the rich text editor.
- **Uploading Media:** Use the file uploader to attach project images or PDF resumes. The system automatically handles secure cloud storage via Supabase S3.
- **Publishing:** After reviewing your content, click Publish. The system will immediately generate a unique public slug and make your portfolio live.

5. Administrator Guide

The Administrator Dashboard is the central control hub, providing absolute oversight over system operations, users, and content.

- **User Management:** Admins can add new users, update profiles, or deactivate accounts. This interface is also used to assign specific roles.
- **Content Moderation:** Admins possess global authority to unpublish, edit, or delete any portfolio if it violates platform policies.
- **Audit Logging:** To maintain security, admins can review system activity logs to trace exactly who modified content and when.
